

Thank you for your commitment to
ALWAYS
providing exceptional care

Jeanie Stattelman

My journey with the HOPES program started in 2018 when I found out I was pregnant. This employee always checked with me after my appointments and ultrasounds and helped make my rough pregnancy exciting. She helped me with providing information for other services as well like UDMO, WIC, EBT, and insurance. I honestly don't know what I would have done without her.

Being a first-time mother and after a short stay in the NICU, I was very scared and overwhelmed. This employee always reassured me that I was doing the best I could and would correct me if I was doing something wrong. She always said reading is the most important thing you can do, "READ EVERYDAY!" So, I did. And the other day my daughter, who just turned 3, read/repeated an entire book to me. I am amazed at how smart and strong that little 4 lb. 12 oz baby girl of mine is. And I know without this employee's guidance and tips/tools, I would not have been so successful with that.

I was able to reach out to her in between appointments if I had concerns or questions. She not only helped me grow as a mother, but as an overall person. She will always hold a special place in my heart. I highly recommend the HOPES program to any parent, especially first timers. Thank you for everything the past 3.5 years Jeanie Stattelman, you are truly the best.

Congratulations Jeanie on being Humboldt County Memorial Hospital's Healthcare Hero!
